

EXO 17S

2.2mL / box

EXOSOME-ENHANCED PDRN REGENERATIVE SYSTEM

Powered by Advanced Exosome Technology for superior cellular signaling and faster tissue repair

KEY INGREDIENTS

- ▶ **STEM CELL-DERIVED EXOSOMES:**
Advanced extracellular vesicles that act as intelligent "messengers," delivering bio-signals directly to damaged skin cells to trigger rapid self-repair and regeneration.
- ▶ **EXOSOME-PDRN COMPLEX:**
A breakthrough synergy of Sodium DNA (PDRN) and Exosome technology that significantly amplifies collagen synthesis and wound healing compared to conventional PDRN.
- ▶ **SIGNALING NIACINAMIDE:**
High-purity brightening actives encapsulated within Exosomes for deeper dermal penetration, effectively targeting hyperpigmentation at its source.
- ▶ **VITALITY EXOSOME CARRIER:**
Utilizing Panax Ginseng and a mineral complex as a nutrient-rich medium to ensure maximum Exosome stability and biological activity.

CORE BENEFITS

- ▶ **EXOSOME REGENERATIVE THERAPY:**
Restructures skin at a biological level, "resetting" aging cells and boosting natural collagen production for long-term vitality.
- ▶ **DEEP SIGNALING HYDRATION:**
Leverages the ultra-small structure of Exosomes to deliver Sodium Hyaluronate deep into skin layers, instantly plumping the skin and smoothing fine lines.
- ▶ **BIO-LEVEL PORE REFINEMENT:**
Restructures the skin surface and tightens enlarged pores through advanced Exosome bio-signaling.
- ▶ **INTENSIVE TISSUE REPAIR:**
Ideal for healing compromised skin barriers and soothing sensitivity.

TARGET AUDIENCE

- ▶ Clients showing early signs of aging, such as sagging or fine lines.
- ▶ Individuals with dull, fatigued, or dehydrated skin.
- ▶ Those with enlarged pores and uneven skin texture.
- ▶ Post-treatment patients needing skin recovery (after laser, chemical peels, or microneedling).

PRODUCT ADVANTAGES

- ▶ **NEXT-GEN CELLULAR REPAIR:**
Unlike standard PDRN serums, EXO 17S utilizes an Exosome delivery system to "reprogram" damaged cells at a biological level with greater speed and precision.
- ▶ **EXO-SIGNALING TECHNOLOGY:**
These extracellular vesicles act as a signaling powerhouse, triggering the skin's natural self-repair mechanisms and driving superior collagen production.
- ▶ **SUPERIOR BIOAVAILABILITY:**
A minimalist yet potent formula that uses Exosomes to transport high-performance actives deep into the dermis without unnecessary fillers.
- ▶ **BIO-ACTIVE REJUVENATION:**
Visibly reduces the appearance of wrinkles and restores elasticity through stem cell-derived regenerative mechanisms.

USAGE INSTRUCTIONS

- ▶ **PROFESSIONAL PROTOCOLS:**
Optimized for Mesotherapy (micro-injections), Microneedling, Derma-rolling, or Electroporation.
- ▶ **HOME CARE ROUTINE:**
Use as a concentrated treatment serum. Apply 2-3 drops to a cleansed and toned face, massaging gently in upward motions until fully absorbed.
- ▶ **FREQUENCY:**
Recommended for daily use (morning and evening) to maintain long-term skin vitality and glow.
